Version 4.x

Version	Date	Description	Jira-Task (only internal)	Setup
4.2.0.453		Added <ul style="list-style-type: none">• Add parameter support inside the Upload-URL• Add Spanish helpfile		
4.2.0.456		Added <ul style="list-style-type: none">• Added Support of 4096 Encryption Keys Fixed <ul style="list-style-type: none">• Bugfix to avoid crashes or warnings before and after signing• Bugfix that no Pad was found		
4.2.0.460		Added <ul style="list-style-type: none">• Function to lock the Form fields with the 1. Signature, this is the default behavior now (can be disabled in the configuration under file-handling)• Export function for Random Key Fixed <ul style="list-style-type: none">• Bugfix for missing temp folder• Bugfix for using existing DigSig Fields		
4.2.0.494		Added <ul style="list-style-type: none">• Support of DigSig Fields which are already inside a PDF Document. The fields have to be selected in the SSS or XML file by their Fieldname.• Added Default Timeserver to eSO Settings which can be used for the timestamp. This server is hosted by StepOver (http://stepoverinfo.net:88/tsa/). Information's about trusted timestamping can be found in Wikipedia: http://en.wikipedia.org/wiki/Trusted_timestamping		
4.2.0.497		Added <ul style="list-style-type: none">• Add NotaryInformation from Signaturpad to each Signature• Notary Information can be check with eSignatureOffice (Menü: Check)		
4.2.0.500		Fixed <ul style="list-style-type: none">• Increased Versionnumber to 500, the last Versions had a to low Number		
4.2.0.511	2011-10-05	Added <ul style="list-style-type: none">• Directory and Pagepreview, there are new Options for this in the Administration• new XML Tags for Stamp, Confirmation dialog, BackgroundImage and Location Fixed <ul style="list-style-type: none">• Background-Image Upload in Standard-Signmode		
4.2.0.527	2011-11-07	Added <ul style="list-style-type: none">• new XML Tags for MacroButton-Historie and a to see if a Keyword was found or not• new mode for the pagepreview, can be activated in the Administration under Directory• timeserver is now used by default• new parameter to change Display brightness of the ColourPad Fixed <ul style="list-style-type: none">• Problem with unvalid Signatures when the PDF-Form lock was activated• Renderproblems by scanned PDFs• Accessviolation with the Textsearch (Intelligent Fields)		

4.2.0.529		<p>Added</p> <ul style="list-style-type: none"> Signature Properties for Location, Reason and Signer <p>Fixed</p> <ul style="list-style-type: none"> missing German translation for new Options Problems with XML Tag MacroButtonHistory 		
4.3.0.541	2011-12-16	<p>Added</p> <ul style="list-style-type: none"> Enable a sleeping Pad (ColourPad) <p>Fixed</p> <ul style="list-style-type: none"> Umlaute Problem with in XML Textsearch Problems by PDF's Rendering Problems by PDF 		
4.4.0.548	2012-01-12	<p>Added</p> <ul style="list-style-type: none"> XML Parameters(PDF Copy without Biodata) <p>Fixed</p> <ul style="list-style-type: none"> Fixed Problem with Signature Zoom Not all Signature are visible in the Document Check <p>Removed</p> <ul style="list-style-type: none"> Sealing Option in Macrobuttons (automaticity sealing) 		
4.4.0.560	2012-03-20	<p>Added</p> <ul style="list-style-type: none"> Error7 and Error5 to Retfile More Stamp Informations are possible, the Dialog for that is flexible new XML Parameter Helpfile Option (CHM File) <p>Fixed</p> <ul style="list-style-type: none"> SignInDoc Problems by Landscape Documents Download Problems Font Problems by some font types 		
4.4.0.562	2012-04-03	<p>Added</p> <ul style="list-style-type: none"> Signature Check directly after Signing <p>Fixed</p> <ul style="list-style-type: none"> Signing problems with existing DigSig Fields Signature Check by Signatures with existing DigSig Fields 		
4.5.0.574	2012-05-09	<p>Added:</p> <ul style="list-style-type: none"> Support of Comfort and Flawless Pads N-trig Support New Functions for WebSign (GetWorkMode(); SetMode(); HighlightFields(); SetActiveField();) New XML Tags (ReturnFormFieldValues, DisableAutoJumpToPrevField, EnableLastFiledSkipping, DisableBackButton) <p>Fixed:</p> <ul style="list-style-type: none"> Zoom returns after Signing to previous level (WebSign) Problem with PC Lock/Standby PDF Rendering Problems 		
4.7.0.686		<p>Fixed</p> <ul style="list-style-type: none"> Problem when you change Windows Size while Signmode is active issue with VirtualStore and the file Customer.bmp German Translation Problem 		
4.7.0.688	2013-04-19	<p>Add</p> <ul style="list-style-type: none"> Mousewheel scrolling to form mode Signature Confirmation with "Enter Key" <p>Fixed</p> <ul style="list-style-type: none"> Problem when loaded PDF with an Image-Signature 		
4.9.0.825	2014-03-31	<p>Fixed</p> <ul style="list-style-type: none"> problems by loading eSO caused by OpenSSL Libs sopad using now the saved certificates for signing instead of creating each time a new one 		

4.9.0.830	2014-04-22	Fixed <ul style="list-style-type: none"> last signature is now always visible in SignInDoc-Mode Improved <ul style="list-style-type: none"> the signature less fade out while saving 		
4.9.0.831	2014-04-23	Fixed <ul style="list-style-type: none"> Problem when leaving signature mode with View-Mode Button Problem with HTTPS Connections (updated Transfer.dll) Improved <ul style="list-style-type: none"> Installation with TCP Option will create "TCP and Citrix Extension" Folder + config.ini under AppData 		
4.9.0.835	2014-05-05	Fixed <ul style="list-style-type: none"> AfterCancel was not triggered by SSS and XML Repeat and Abort functions didn't worked correctly 		
4.9.0.836	2014-05-08	Fixed <ul style="list-style-type: none"> AfterCancel Macro was triggered twice by optional signatures a started Signatur was not saved with Macro Button different default values in Startmanager and SOSigOffice 		
4.9.0.842	2014-06-20	Fixed <ul style="list-style-type: none"> Problems with XML Encoding (German Umlauts) by Output XML Problems with <DeviceKeys> Tag (25sec delay) Changing from Sign to View Mode by the first Signature was triggering AfterCancel action Improved <ul style="list-style-type: none"> Error handling in case somebody just draw a single point Add <ul style="list-style-type: none"> Form field option, that you can only insert text as width as the field is (there is still a problem that with different zoom settings the amount of letters you can enter is changing) 		
4.9.0.844	2014-06-26	Fixed <ul style="list-style-type: none"> Problem with Optional Signature (were treated like mandatory fields) Access Violation, when Pad Search was started without connected pad Add <ul style="list-style-type: none"> Option in Administration to enable AfterSigning macro in case all signatures where skipped (by Default this means AfterCancel) Logfile per Day, with option to delete log files older than x days 		
4.9.0.846	2014-06-29	Improved <ul style="list-style-type: none"> Behaviour of Document-View Button while Sign-process 		
4.9.0.848	2014-07-10	Add <ul style="list-style-type: none"> Support of Timeserver with longer Keys (4096) Fixed <ul style="list-style-type: none"> Problems with grey pages while SignInDoc Mode with ColourPad Version 2.0 Improved Speed when swtiching to SignInDoc Mode Problems with form field locking (caused Adobe crash when loading of the PDF) Changed <ul style="list-style-type: none"> The behaviour of WebSign Active-X was changed, in the way that you can start another (second) instance of the Active-X and don't get the error message "another instance is already running". Now the new instance will terminate the existing instance, to allow a page refresh under chrome. 		
4.9.0.850	2014-07-14	Add <ul style="list-style-type: none"> Merging of PDF documents with XML-Input (new tag: <PDF-Merge>) Changed <ul style="list-style-type: none"> TabletPC Support was temporally disabled because of a problem (will be back in 2-3 Weeks) 		
4.9.0.852	2014-07-16	Add <ul style="list-style-type: none"> Error message for the case the signature field was drawn over 2 pages Fixed <ul style="list-style-type: none"> Problems with Macro Visibility Options Document with existing DigSig files won't save after signing Removed Timeserver Response Logging 		

4.9.0.854	2014-07-31	Fixed		
		<ul style="list-style-type: none"> Access violation by closing WebSign with Chrome Browser Incorrect Build number in log files 		
4.9.0.859	2014-08-21	Add		
		<ul style="list-style-type: none"> The same signature position will not be offered for signing if there is already a Signature at the same location inside the document (allows to use the same SSS and PDF multiple times without removing signatures from SSS). Added PKCS12 import to XML and with start parameter A signed DigSig can't be offered again for signing <p>Removed</p> <ul style="list-style-type: none"> old start parameter for setting keys (from eSignatureOffice 3) <p>Fixed</p> <ul style="list-style-type: none"> Accessviolation/Memoryleak by the textsearch (BLS Engine) Rendering Problem of an Barcode Signature-Check showed only the details of the last Signature of the document Save Problem by the combination of DigSig PDF and active Integrity Check after Signing Problem with -nobiodata Parameter (only 1 signature was possible) Problem with Signing Colour in combination with Image Sign function Image Sign function supports now more image types Problem with PNG Image Type for SignImage function Skip Signature behaviour was not working correctly <p>WebSign Problems under Chrome</p> <ul style="list-style-type: none"> multiple problems with Termination of WebSign under Chrome (OM-2, OM-3, OM-4, OM-5, OM-6, OM-12) 		
4.10.0.861	2014-08-28	Add		
		<ul style="list-style-type: none"> Option for SSS and XML to show/disable the Signer-Request-Dialog document content can be used in macrobutton (Textsearch) <p>Fixed</p> <ul style="list-style-type: none"> Message Windows sometimes open in Background Messages from devices was not handle and timeouts happens Problem with Rendering-Threats between Signatures which were causing crashes Zero Values in decrypted Biodata are removed Message that the following signature is the last of the signature-set was not displayed. Import of that Value by SCS will only work with new SCS Files. Save As was not Working in Menu of old/classic GUI HTTP/FTP Problems in combination with XML and Macrobutton Problems in case Timeserver URL is wrong and Signature Process was canceled Signature Lines with old 1.x Firmware Pads where very thin Change Error Message "Unable to load existing Signatures" to "Too less Signature-data. Please repeat." <p>Changes</p> <ul style="list-style-type: none"> Timeout Parameter in SSS (+added to XML), it's now also saving a signature in case there are enough biodata Replace the Abort-Button in Signer-Request-Dialog with a Button "No Stamp" 		
4.10.0.866	2014-09-15	Fixed		eSignatureOffice410_140915
		<ul style="list-style-type: none"> Crash with happens with customer documents in combination with higher amount of signatures Reloading of SecureSign was not working Problems what Message or other Popup Windows stay in background, while using StayOnTop Parameter 		
4.10.0.870	2014-09-30	Fixed		eSignatureOffice410_140930
		<ul style="list-style-type: none"> Biodata String was missing meta data of the signature rectangle Administration Windows was blank in case it was accessed with SecureSign Driver-XML check was not working correct Rendering Problems which causing crashes (after signature and loading of the document) <p>Add</p> <ul style="list-style-type: none"> Text search function for Macro Settings (e.g. to use content of the document for Email sending) 		

4.10.0.872	2014-10-28	<p>Fixed</p> <ul style="list-style-type: none"> • Sign Button was not visible after reload of SecureSign • Language Parameter (lang=) was not working anymore • Option to disable the Timeserver is not reachable message, was not correctly saved • Translation in Stamp Popup Windows was wrong • AccessViolation in WebSign (changing into signmode) • missing and wrong translations in Administration <p>Add</p> <ul style="list-style-type: none"> • New Option to handle read-only attribute when saving the pdf 		eSignatureOffice410_141028
4.10.0.884	2014-12-19	<p>Fixed</p> <ul style="list-style-type: none"> • small font when formfield was set to autosize • access violation when signature was saved (with FW 1.x devices) • multisign option was not detecting a signature at the same position inside the document (rounding error) • macro save option windows was not closing then renaming field was empty and renaming was disabled • incorrect versions number in HKLM • licence was not correctly saved (after program restart the licence popup came again) • PDF Rendering Problems <p>Add</p> <ul style="list-style-type: none"> • More Tooltips • Optional abort button for optional signatures (will stop signature process) • General Signature Options can be edit now (new Button in Signature-Set Window) • notification when search text was not found inside the document (file-renaming) • visibility of macro buttons have not start and end time • Showing serial numbers in device search dialog <p>Changed</p> <ul style="list-style-type: none"> • Signature-Set Creation Window (renaming of Options and layout changes) 		eSignatureOffice410_141219
4.10.0.890	2015-02-03	<p>Fixed</p> <ul style="list-style-type: none"> • wrong file name is used by macrobutton option for save as • problem with logging <p>Improved</p> <ul style="list-style-type: none"> • TCP-Client Performance 		eSignatureOffice410_150203
4.11.0.896	2015-03-02	<p>Fixed</p> <ul style="list-style-type: none"> • colour device was not showing sign background when signature was repeated • AfterSign / Macrobutton visibility conflict • signature was saved instead of cancel (cause that AfterSign and AfterCandle where triggered) • HashDialog cancel failed when only one signature was part of the set • MacroButton disabeling option while signing was not working correctly • SCS Import Error • language parameter was not working • Macro Problem with classic UI • message before the last signature was not shown • PDF Rendering Problems <p>Improved</p> <ul style="list-style-type: none"> • Document Content search allows to search backwards and between 2 Strings now 		eSignatureOffice411_150302

4.11.0.898	2015-03-17	<p>Fixed</p> <ul style="list-style-type: none"> incorrect "Valid to" time by created certificates incorrect viewing Position by using Directory After Import with Administration the Macrobuttons where not visible (application restart was necessary) problem with too less Signature-data message Set minimum windows width handling when empty string was found by intelligent-renaming <p>Improved</p> <ul style="list-style-type: none"> order by intelligent-renaming can be changed (new up/down button) Windows layout size (using more than 100%) Import Error message with FTPSET and SignatureSet Paths can be disabled Removed FTP Setting as Standard Export-Option 		eSignatureOffice411_150317
4.11.0.901	2015-03-26	<p>Fixed</p> <ul style="list-style-type: none"> Repeat signature with Hash/Confirm Dialog was adding the previous signature image <p>Improved</p> <ul style="list-style-type: none"> Added content search icon Default FTP- and SSS-Set folder will now be placed into user folder 		eSignatureOffice411_150326.exe
4.11.0.901	2015-05-06	<p>Improved</p> <ul style="list-style-type: none"> Updated TCP and Citrix Files (final Versions) 		eSignatureOffice411_150326b.exe
4.11.0.906	2015-07-10	<p>Improved</p> <ul style="list-style-type: none"> incorrect created certificate will now replaced with a correct one automatically 		eSignatureOffice411_150710.exe
4.11.0.906	2015-08-05			eSignatureOffice411_150805.exe
