

Install/Deinstall

eSignatureOffice - Setup Parameter

Parameter	Function
-overwrite	Overwrites a previously installed program so that the old one does not have to be uninstalled.
-lang=	This parameter allows you to select the language in which the program is to be installed. The following options are available: D, GB, ES, IT, PL, NL, F (for German, English, Spanish, Italian, Polish, Dutch and French).
-unattended	Setup runs without user interaction (no questions are asked during installation), showing progress windows unless <i>-silent</i> is passed
-silent	No windows will be displayed during setup.
-path=	Specifies root installation folder. Default path value is "C:\Program Files\StepOver\leSignatureOffice X.X" or under 64Bit "C:\Program Files (x86)\StepOver\leSignatureOffice X.X"
-customer=	Instructs installer to created a Customer Version (for using multiple Version on one system).
-connection=	Install eSignatureOffice as local, TCP or Citrix Version, the following options are available: local, citrix, tcp
-IniDir=	Set path to where the Program.ini should be saved (for multi user Settings) <i>Examples: -IniDir="C:\templateSignatureOffice 4\Settings"</i>
-logs	Enables logging for the following components: <i>SOSigOffice.exe, SOWebSign.ocx, SOSecureSign.ocx, SOPAD.DLL, StepOverSignatureDevice1.ocx</i> (Logs will be saved to c:\temp\logs)
-noConverterUpdate	By default the new Installation of eSignatureOffice is set to start with a already installed PDF Converter, this parameter will prevent this and PDF Converter settings are not changed.
-confirmMessage	A message at the end of the installation is shown that the installation was successfull. Works not in combination with <i>-silent</i> Parameter.
-desktopIcon	Setup creates a Desktop Icon for eSignatureOffice
-installSORootCA	Enables the Installation of the StepOver ROOT CA, for checking the signature
-noOpenWith	Setup will not add an Open with Entry for PDF documents in the contextmenü. By default the Setup add the Entry.
-noConverterSettings	Setup will not set it self for the PDF Converter, by default the Setup sets it self as application which will be started from the PDF Converter
-noMineType	Setup will not register the eSO:// MineType

Examples:

```
eSignatureOffice5xxxxx.exe -overwrite -lang=D -unattended -silent
```

```
eSignatureOffice5xxxxx.exe -lang=GB -unattended -silent -customer=XYZ -connection=citrix
```

StepOver Tiff & PDF Converter - Setup Parameter

Parameter	Function
-overwrite	Overwrites a previously installed program so that the old one does not have to be uninstalled.
-lang=	This parameter allows you to select the language in which the program is to be installed. The following options are available: D, GB, ES, IT, PL, NL, F (for German, English, Spanish, Italian, Polish, Dutch and French).
-unattended	Setup runs without user interaction (no questions are asked during installation), showing progress windows unless <i>-silent</i> is passed <i>Important: you need to select -pdf and/or -tiff otherwise no printer will be installed</i>

-silent	No windows will be displayed during setup.
-path=	Specifies root installation folder. Default path value is "C:\Program Files\StepOver" or under 64Bit "C:\Program Files (x86)\StepOver"
-customer=	Instructs installer to create a Customer Version (for using multiple Version on one system).
-pdf	Installs the PDF printer

Deinstallation

You can automatically Deinstall the Software by using the Deinstallation Files.

Deinstall

```
Run %WindowsFolder%\StepOver%\ProductName%\uninstall.exe
with parameters
"/U:%AppFolder%\eSignatureOffice4\Uninstall\uninstall.xml\" -unattended
-noreboot
```

Example

```
"C:\Windows\StepOver\eSignatureOffice 5.5\uninstall.exe" "/U:C:\Program
Files (x86)\StepOver\eSignatureOffice 5.5\Uninstall\uninstall.xml"
-unattended -noreboot /s
```
